DEPARTMENT: INFORMATION TECHNOLOGY

COLLEGE: COLLEGE/ UNIVERSITY:ST.PAUL'S COLLEGE OF ARTS AND SCIENCE FOR WOMEN
,BHARATHIYAR UNIVERSITY

PROJECT TITLE

My first web portpolio: learning HTML,CSS & Java basic

AGENDA

1. Problem Statement
2. Project Overview
3. End Users
4. Tools and Technologies
5. Portfolio design and Layout
6. Features and Functionality
7. Results and Screenshots
8. Conclusion
9. Github Link

PROBLEM STATEMENT

As a beginner in computer science, I wanted to create a simple digital portfolio to showcase my learning journey. I faced challenges like understanding basic syntax, layout design, and how to connect different parts of a webpage.

PROJECT OVERVIEW

This project is a basic student portfolio website built using HTML and CSS. It includes sections like About Me, Skills, Projects, and Contact Info. I also added a small JavaScript to demonstrate my coding practice.

WHO ARE THE END USERS?

Myself (to track progress)

Teachers (for review and feedback)

Friends and classmates (to share ideas)

Future recruiters (as I grow my skills)

TOOLS AND TECHNIQUES

*HTML for structure

*CSS for styling

*Java for basic scripting

*CodePen as my editor

*GitHub for version control and sharing

POTFOLIO DESIGN AND LAYOUT

- Simple layout with a header, navigation bar, and footer
 - Light color scheme for readability
- Responsive design using basic CSS media queries
 - Organized sections with clear headings
- Responsive layout (mobile + desktop view)

FEATURES AND FUNCTIONALITY

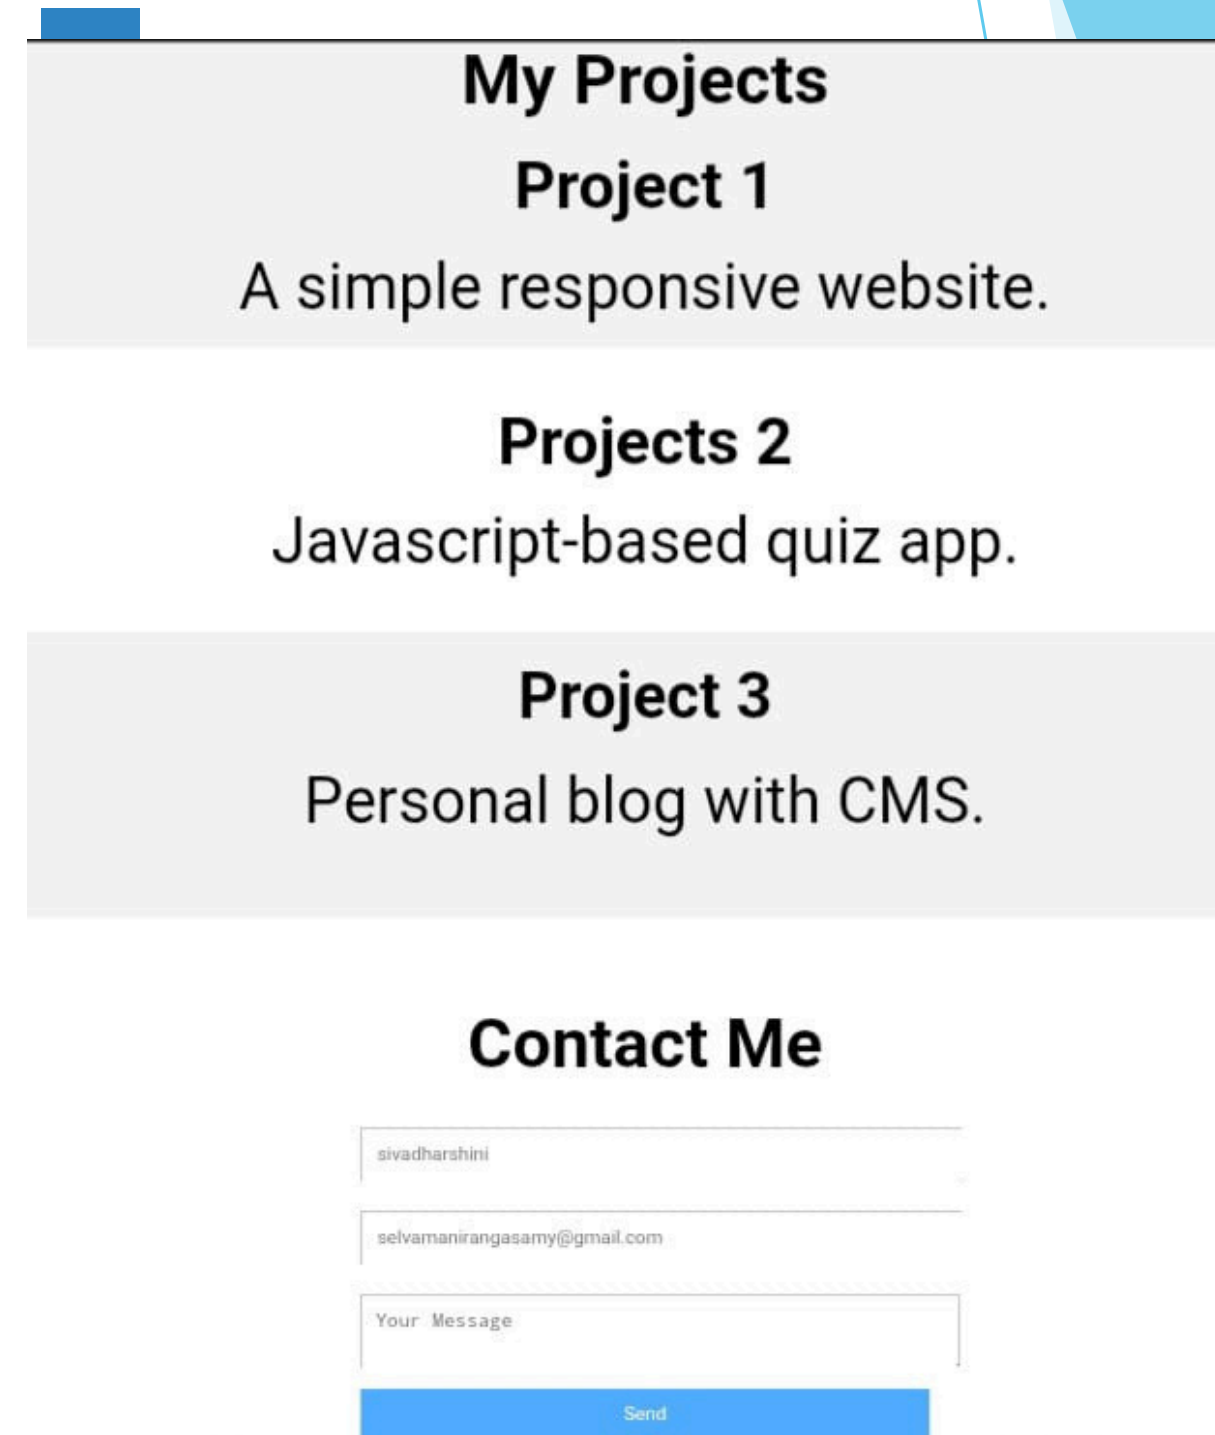

- About Me section with a short intro
- Skills section listing HTML, CSS, and Java scripts
- Projects section with screenshots and descriptions
- Contact form (non-functional, just for design practice)
 - Java script that prints a welcome message

RESULTS AND SCREENSHOTS

About Me

 Profile Photo

CONCLUSION

This project helped me understand how web pages are built and styled. I learned how to organize content, use basic tags, and apply CSS rules. I also got familiar with GitHub and how to share my work online.
